Education

University of Wisconsin-Madison

Computer Sciences, PhD

Minor in Statistics

Computer Sciences, MS

Madison, WI
2016-Present

2014-2016

- Advisors: Vikas Singh and Michael Newton
- Research in Machine Learning and Computer Vision
- Thesis Topic: Identifying Feature, Parameter, and Sample Subsets in Machine Learning and Image Analysis
- Relevant Coursework: Artificial Intelligence, Machine Learning, Computer Vision, Statistical Inference, Linear and Nonlinear Optimization, Graphical Models, Stochastic Processes, Computational Statistics

University of Michigan-Ann Arbor

Computer Engineering, B.S.E.

Ann Arbor, MI
2010-2014

- Selected Coursework: Autonomous Robotics, Design of Microprocessor-based Systems, Embedded Control Systems, Design and Manufacturing, Control Systems Analysis and Design

Experience

Computer Sciences Department, UW-Madison Graduate Research Assistant

2015-Present

- Collaborating with Vikas Singh and others on machine learning and computer vision research projects, continuing with applications in modeling preclinical development of Alzheimer's disease with the Wisconsin Alzheimer's Disease Research Center.
- Research focuses on problems of Selection in Machine Learning: Which features, samples, or models are minimally sufficient or important based on a specified measure of interest (accuracy, fairness, model size, etc.)?

American Family Insurance Enterprise: Machine Learning Intern

Madison, WI 2021-2022

- Created a fairness toolbox for understanding and accounting for unfairness and bias in large datasets and machine learning models.
- Worked with ML team members to understand and deploy fair deep learning methods and models.
- Developed new methods for fairness regularization via high-dimensional Earth Mover's Distance formulations, concluding in NeurIPS conference submission.

Biostatistics and Medical Informatics Department, UW-Madison Research Fellow

2016-2019

- Collaborated with Michael Newton and Sterling Johnson, specifically on developing and applying methods for the analysis of medical imaging data in collaboration with the Wisconsin Alzheimer's Disease Research Center.

Computer Sciences Department, UW-Madison CS 760: Machine Learning Teaching Assistant

Spring 2015

- Developed and assigned written and programming homework assignments.
- Held office hours and provided general teaching support.
