# Ronak R. Mehta

5770 Medical Sciences Center
1300 University Ave., Madison, WI 53706
ronakrm@cs.wisc.edu
pages.cs.wisc.edu/~ronakrm

## Education

**University of Wisconsin-Madison**  *Madison, WI*
Computer Sciences, PhD  *2014-Present*
  Minor in Statistics
Computer Sciences, MS  *2014-2016*

- Advisors: Vikas Singh and Michael Newton
- Research in Machine Learning and Computer Vision
- Relevant Coursework: Artificial Intelligence, Advanced Machine Learning, Computer Vision, Statistical Inference, Linear and Nonlinear Optimization, Graphical Models, Stochastic Processes, Computational Statistics

**University of Michigan-Ann Arbor**  *Ann Arbor, MI*
Computer Engineering, B.S.E.  *2010-2014*

- Selected Coursework: Autonomous Robotics, Design of Microprocessor-based Systems, Embedded Control Systems, Design and Manufacturing, Control Systems Analysis and Design

## Experience

**Computer Sciences Department, UW-Madison**  *2015-Present*
**Graduate Research Assistant**

- Collaborating with Vikas Singh and others on machine learning and computer vision research projects, continuing with applications in modeling preclinical development of Alzheimer's disease with the Wisconsin Alzheimer's Disease Research Center.
- Research focuses on problems of Selection in Machine Learning: Which features, samples, or models are minimally sufficient or important based on a specified measure of interest (accuracy, fairness, model size, etc.)?

**American Family Insurance**  *Madison, WI  2021-2022*
**Enterprise: Machine Learning Intern**

- Created a fairness toolbox for understanding and accounting for unfairness and bias in large datasets and machine learning models.
- Worked with ML team members to understand and deploy fair deep learning methods and models.
- Developed new methods for fairness regularization via high-dimensional Earth Mover's Distance formulations, concluding in NeurIPS conference submission.

**Biostatistics and Medical Informatics Department, UW-Madison**  *2016-2019*
**Research Fellow**

- Collaborated with Michael Newton and Sterling Johnson, specifically on developing and applying methods for the analysis of medical imaging data in collaboration with the Wisconsin Alzheimer's Disease Research Center.

**Computer Sciences Department, UW-Madison**  *Spring 2015*
**CS 760: Machine Learning Teaching Assistant**

- Developed and assigned written and programming homework assignments.
- Held office hours and provided general teaching support.

**EECS Department, UM-Ann Arbor**  *Spring 2014*
**EECS 373: Embedded Systems Teaching Assistant**

- Led laboratory sections and held lab office hours.
- Assisted students with lab assignments and course projects.

**Continental Automotive Systems**                                      *Deer Park, IL  Summer 2013*
**Business Unit Transmission: Embedded Software Engineering Intern**

- Developed an application to systematically test multiple features of a transmission control module in parallel asynchronously using NI LabView and NI bench-testing hardware.
- Identified known bugs from previous software releases through extended test runs.
- Gained extensive knowledge of automated testing and embedded software systems.

# Publications

**Deep Unlearning via Randomized Conditionally Independent Hessians.**
CVPR 2022. *Ronak Mehta, Sourav Pal, Vikas Singh, Sathya Ravi.*

**Investigating Functional Brain Network Abnormalities via Differential Covariance Trajectory Analysis and Scan Statistics.**
ISBI 2022. *Anita Sinha, Ronak Mehta, Veena Nair, Rasmus Birn, Vikas Singh, Vivek Prabhakaran.*

**Graph Reparameterizations for Enabling 1000+ Monte Carlo Iterations in Bayesian Deep Neural Networks.**
UAI 2021. *Yuri Nazarov, Ronak Mehta, Vishnu Lokhande, Vikas Singh.*

**Scaling Recurrent Models via Orthogonal Approximations in Tensor Trains**
ICCV 2019. *Ronak Mehta, Rudrasis Chakraborty, Yunyang Xiong, Vikas Singh.*

**Resource Constrained Neural Network Architecture Search: Will a Submodularity Assumption Help?**
ICCV 2019. *Yunyang Xiong, Ronak Mehta, Vikas Singh.*

**DUAL-GLOW: Conditional Flow-Based Generative Model for Modality Transfer.**
ICCV 2019. *Haoliang Sun, Ronak Mehta, Hao H. Zhou, Zhichun Huang, Sterling C. Johnson, Vivek Prabhakaran, Vikas Singh*

**Sampling-free Uncertainty Estimation in Gated Recurrent Units with Applications to Normative Modeling in Neuroimaging**
UAI 2019. *Seong Jae Hwang, Ronak R. Mehta, Hyunwoo J. Kim, Sterling C. Johnson, Vikas Singh.*

**On Training Deep 3D CNN Models with Dependent Samples in Neuroimaging**
IPMI 2019. *Yunyang Xiong, Hyunwoo J. Kim, Bhargav Tangirala, Ronak Mehta, Sterling C. Johnson, Vikas Singh.*

**Finding Differentially Covarying Needles in a Temporally Evolving Haystack: A Scan Statistics Perspective**
Quart. Appl. Math. 2019. *Ronak Mehta, Hyunwoo J. Kim, Shulei Wang, Sterling C. Johnson, Vikas Singh.*

**Provably Robust Image Deconvolution via Mirror Descent**
arXiv Preprint. *Sathya Ravi, Ronak Mehta, Vikas Singh.*

# Talks and Presentations

**CIBM Annual Retreat, 2018.** Presented a short talk on Differentially Evolving Temporal Covariances at *Computation and Informatics in Biology and Medicine 2018 Annual Retreat*.

**Diff-CVML, CVPR 2018.** Presented a short talk and poster on Differentially Evolving Temporal Covariances at *Computer Vision and Pattern Recognition 2018*, at the *4th International Workshop on Differential Geometry in Computer Vision and Machine Learning*.

**MCVW 2018.** Presented a poster on Provably Robust Image Deconvolution via Mirror Descent at the *Midwest Computer Vision Workshop 2018*.

**BMI Training Presentations Fall 2017.** Presented work on measuring uncertainty in recurrent neural networks, with applications to neuroimaging for the Biostatistics and Medical Informatics Training Seminar.

**AIRG Fall 2017.** Presented and lead a discussion on variational inference for the AI Reading Group.

**AIRG/EA Madison Fall 2017.** Presented and lead a discussion on existential risk and AI Safety for AIRG and Effective Altruism Madison.

**BMI Training Presentations Spring 2016.** Presented final work on identifying second-order trends in high-dimensional temporal data for the BMI Training seminar.

**AIRG Fall 2016.** Presented and lead a discussion on stability and generalization.

**BMI Training Presentations Fall 2016.** Presented preliminary work on identifying second-order trends in high-dimensional temporal data for the BMI Training seminar.

**AIRG Fall 2015.** Presented and lead a discussion on the graphical lasso, and inverse covariance estimation.

**AIRG Spring 2015.** Presented and lead a discussion on Recurrent Neural Networks.
